

REISER

# ROTOCLAW II

ROBERT REISER & CO., INC. 725 DEDHAM STREET, CANTON, MASSACHUSETTS 02021 (617) 821-1290

## FROZEN MEAT BREAKER

The ROTOCLAW II reduces hard frozen blocks with no aggravating noise. Its slow speed rotor produces chunks without destroying the texture of the product.

Chunk size can be varied by using higher or lower spacers to satisfy most processing requirements.

The ROTOCLAW II will handle frozen blocks up to 9½ inches thick and 21 inches wide.

Production rate varies from 6,000 to 15,000 lbs/hr. depending on desired chunk size. For high production, blocks can be stacked one on top of another using the built-in air-operated loader.

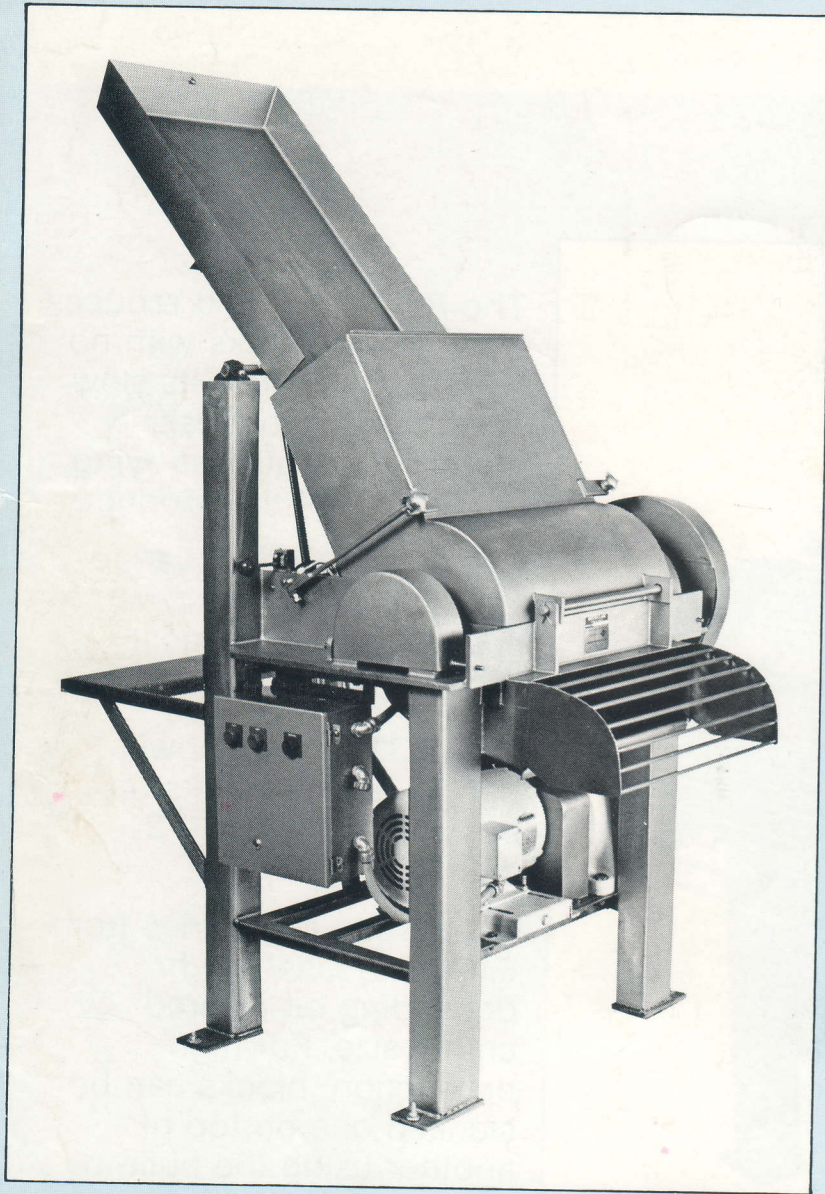

*Quiet, rugged, dependable,* the ROTOCLAW II is built for years of trouble-free operation.

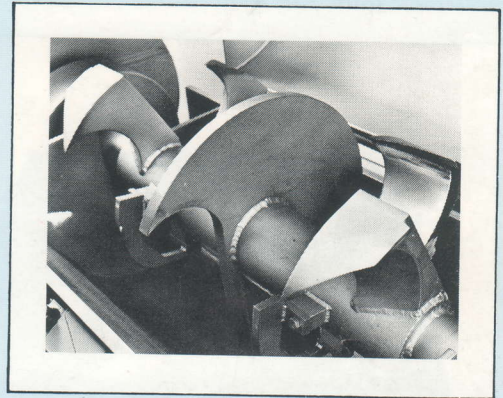

# REISER ROTOCRAW II

## FEATURES:

- All stainless steel
- Rugged construction
- Compact design
- Built-in loader
- Ultra quiet operation
- No knives to sharpen
- Quick, easy clean-up
- Negligible maintenance

Stainless Steel Claws on slow-turning rotor break up blocks *quietly*.
