

SUPERFLEX

One Machine, Endless Flex

The best of all breading options—in one machine. Easily customize the appearance of your product day-to-day. The SuperFlex frees up extra production space by replacing multiple breading machines. End the need to switch out machinery to achieve different product textures.

THE NOTHUM WAY

Since 1971, Nothum Food Processing Systems has been a leading manufacturer of batter/breading lines for the poultry, seafood, alternative protein, and appetizer industries.

We're a third-generation family-owned business, and we've built our reputation as experts in further processing by focusing on what matters: Making the very best equipment and always putting people first.

Why It's Different

- Four machines in one: flat, drum, triple-flip, and hand-tossed breader
- Product changeover in minutes without switching machines on the line
- Designed to protect breading through the process and increase yield
- Less charge and faster turnover

The Bottom Line

- Payback in less than 6 months
- Increases yield while decreasing breading waste by as much as 50%
- Significantly less downtime and changeover time
- Reduce floor space and eliminate redundant equipment
