

Printed Film & VFFS Machine Solutions

9500B3

The Pacmac 9500B3 is the industry standard, high speed vertical form, fill and seal machine. Combined with multiple choices of filler tubes, the 9500B3 is configured to produce conventional 3-sided pinch-seal style bags up to 15" X 19" flat and 15" X 30" pillow style bag dimensions. Plus, the 9500B3 machines can easily be upgraded with a zipper application at any time. Pacmac machines can run either single, one-structure films or multi-layer laminated films of most structures.
